Lenar Gasimov, Junior Python Developer

I am looking for new opportunities to implement and increase my skills in software development and web development. New challenges don't bother me, but rather inspire, as they give me the opportunity to grow up and develop, and the habit of not give up helps me in this. Creating and building projects that solve or fix a problem is a high priority for me.

Skills

HTML & CSS

Bootstrap

Python

Django

Flask

Git

Docker

PostgreSQL
